## - Designing a Rotating Railing to Prevent Falls from Balconies -

Mikiko Oono<sup>1,2</sup>, Koji Kitamura<sup>1,2</sup>, Yoshifumi Nishida<sup>3,2</sup>, Tatsuhiro Yamanaka<sup>4,2</sup>

1. National Institute of Advanced Industrial Science and Technology 2. Safe Kids Japan

3. Tokyo Institute of Technology 4. Ryokuen Children's Clinic

**Children challenged if they successfully climbed up, using the rotating bar.**

73 children aged from 2 to 6 year-olds participated the experiment.

Rotating railing was very effective in reducing the abilities of climbing over the railing in children.

Instruction-based intervention programs are viable in changing safety-related attitudes and behavior

# Óscar del Castillo Andrés

## University of Seville

Author: Óscar del Castillo Andrés. University of Seville.  
ocastillo@us.es

- Falls are the second leading cause of unintentional injury deaths.
- 37.3 million falls that are severe enough to require medical attention.
- Strategies should emphasize education, prioritizing fall-related research.

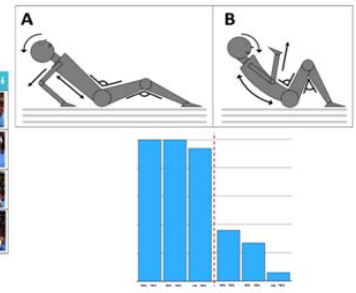

Sample: 141 students

Peace of Mind for a  
Lifetime:  
Project Kid's Safe

Do you know how many American children live in households with at least 1 unlocked and loaded firearm?

Have you ever purchased gun locks or gun lock boxes for your coalition? Let me show you how.

Does your state coalition provide you with resources? Let me show you what Safe Kids South Carolina is doing.

Do you know how much more safe children will be if guns are locked up and stored safely?

Thank you for attending Poster Dash Round 2!

Don't forget to attend the Poster Viewing  
Session afterwards (5:15 pm – 5:45 pm)
