CCIC Home Safety Program

Reducing Barriers to Prevention

Dawne Gardner, MBA ,CPST
Injury Prevention Sr Specialist
Comprehensive Children's Injury Center (CCIC)

Setting the stage for successful and scalable intervention(s)

- 178,204 children ages 0-16 in Hamilton County
 - Do we focus on a mechanism of injury?
 - Do we focus on an age range of children?
 - Do we focus on a location of injury?
 - Where do we start within Hamilton County?

Trauma Registry Data Collection

- CSN
- Medical Record Number
- Name
- Date of Birth
- Age
- Age Group
- Gender

- Mode of Injury
- Date of Surgery
- Injury location (address)
- Street Address
- City
- State
- Zip Code

Mode of Injury Collected

- Abuse
- Bicycle/Non-Motorized scooter
- Bite
- Burn
- Fall/Jump
- Motorized Vehicle/Bike/ Cycle/Scooter
- Pedestrian
- Penetrating/Cut/Piercing
- Poison
- Sports Injury
- Struck by, against

- 832 homes with 1,150 children
 years old
- 80% of children living below the poverty level
- 92% of injured children seeking emergency care presenting to CCHMC
- 11.3/1000 injuries per month compared to county baseline of 8.7/1000

Barriers to Prevention (internal brainstorming)

Social Determinants of Health (SDH)

- Neighborhood Socioeconomic Status
- Geographic Isolation
- Race/Ethnicity
- Language and limited English proficiency
- Health Literacy
- Historical and current unequal distribution of social, economic, and environmental resources
- Access to Education
- Insurance Status

Understanding Injuries in Norwood

- Inequities in who gets injured and how severe their injury is
- Trying to understand individual and community factors associated with injuries

- Two specific questions:
 - Are there things about individual children that makes them more likely to be injured?
 - Are there things about the neighborhood (social determinants of health) that increase the rate of injury for children in the neighborhood?

Community Identified Barriers to Prevention

- Access to Education/Resources
 - Not easily accessible
 - Community suggested traditional & non-traditional outreach days/hours
 - Cost of equipment
 - Tools to install equipment
- Location
 - Education/resource dissemination
- Presentation of Outreach
 - Educational material
 - Literacy level
 - Don't make families feel they are doing it wrong
 - "Don't tell us what to do."
 - "Don't talk at us"
 - Who is doing the outreach?
 - Trusted resource

"Meet Us Where We Are"

Grassroot Outreach Model

Community members co-leading the community/hospital partnership, Preventing Injuries in Norwood (PIN), identified best methods of outreach for Norwood families:

- In-home safety education
- Free safety equipment bundle
- On-the-spot installation

Home Safety Bundle:

- Smoke/CO Detector
- Pressure Mounted Safety Gate
- Outlet Covers
- Cabinet/Drawer Locks
- Bathtub Thermometer
- Non-Slip Bathtub Appliques
- Bathtub Spout Cover
- Nightlight
- Doorknob Covers
- Magnet, Emergency Phone List
- Pack-N-Play (case-by-case basis)
- Gun lock Box (case-by-case basis)
- Medication Lock Box (case-by-case basis)

In-Home Safety Visit

(Outreach Awareness Strategies)

- Utilized word of mouth to spread awareness
 - "PIN Was Here" yard signs identifying homes that received outreach
 - Community could seek outreach information from neighbor's w/yard signs (trusted resource)
- Created urgency with limited number of resources and an outreach deadline
- Norwood 100 home safety visits provided Monday-Friday during business hours

The **Norwood100** Project

100 Homes

Do you live in **Norwood**?
And, do you care for at least one kid **under 5**?

100 Bucks

Want FREE stuff? (\$100 value)

100 Days

Sign up NOW! (the clock is ticking...)

www.norwood100.org

The *Norwood100* Project is a **100**-day campaign to provide **100** homes in Norwood, Ohio with \$**100** worth of child safety equipment, for free. **Yes, free.**

Homes, apartments, and daycares located in **zip code 45212.**

Parents, guardians, day care providers and babysitters...

we're talking to you!

What's in the \$100-value hundle?

- Smoke Detector
 Carbon Monoxide Detector
- Pressure Mounted Safety G
 Electrical Outlet Covers
- Cabinet/Drawer Locks
 Door Knob Covers
- Bathtub Thermometer
 Non-Slip Bathtub Stickers
- Bathtub Spout Cover
 Nightlight
- Emergency Contacts Magnet
 Child Safety Book

Hurry!

Sign up before September 8, 2015.

The clock is ticking!

Volunteer Driven Safety Day

- Saturday volunteer event (non-traditional day)
- Event held 4-5 times a year
- 4-hour volunteer commitment
- Multiple homes engaged in one day
- Volunteers included businesses, employees of outreach funders, Cincinnati Children's employees, social groups

Volunteer Driven Safety Day (Day of Schedule)

- Volunteers meet at Home Safety Hub (located in the community)
 - Light breakfast
 - Receive Day of Logistics
- Safety Team Assignments (teams of 2)
 - Volunteers encouraged to bring a friend[®]
- Safety Team Decisions
 - O Who will install?
 - O Who will educate?
- Training-approx. 20 min
 - o Installer-cabinet locks, smoke/CO detector, safety gate
 - Educator-safety script for all bundle equipment
- From Hub to Homes
 - Teams receive pre-registered home visit assignments (4-5 homes per team)
 - Load safety bundles in car & depart to home visits
- Return to Home Safety Hub
 - Lunch/feedback

Did you know that kids under 5 are most injured in the home?

Do you have or care for a child <u>under the age of 5</u> and live in <u>45212</u>

We will deliver a FREE safety equipment bundle to your home/apartment on

Saturday, May 11th

What's in YOUR FREE bundle?

Smoke & Carbon Monoxide Detector (10 year battery, Safety Gate

Electrical Outlet Covers

Door Knob Covers

Window/Patio Locks

Bathub Thermometer

Non-Sija Bathub Stickers

Bathub Spout Cover

KEEP YOUR KIDS SAFE!!
Call (513) 517-HOME and sign-up to get your free bundle
before it's too late!

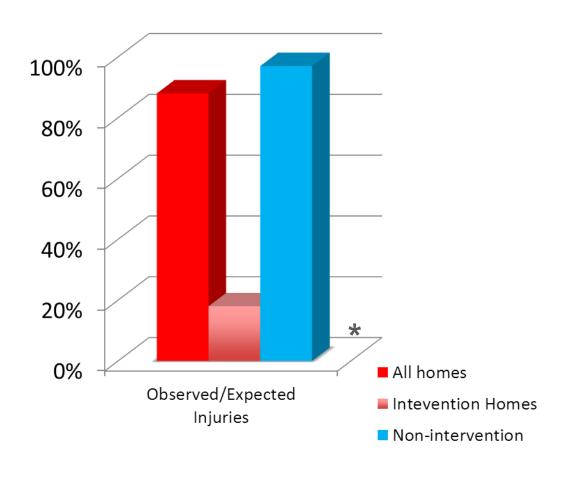

Injury Reduction in Intervention Homes

- 1150 Norwood Children Ages 1-4
 We have reached 184 (16%) in 130
 Homes
- 82% reduction in intervention homes
- Estimate that if intervention into 40% of homes, internal goal of 30% community home injury reduction could be met

COVID Changes to Outreach

- Virtual Education
- Safety Bundle dropped off at door
- Changes in Safety Equipment Bundle
 - Push down cabinet locks replaced with long handled cabinet locks (no tools needed to install)
 - Smoke/CO detector activated and placed on shelf/dresser in sleeping area
 - Safety gate installation video link texted to family How to Install a Child Safety Gate | Cincinnati Children's - YouTube

Assembly Style Outreach

- Education/resource dissemination in a community location (reaching families who will never open their door to an inhome visit)
- 1 Hour commitment for family
 - Encouraged not to bring children, but babysitter is provided
 - Light snacks
- Families receive classroom style education & take safety bundles home to install (encouraged to call injury team w/installation issues)
- Outreach schedule in evenings (non-traditional hours)

Shared Value and Goals

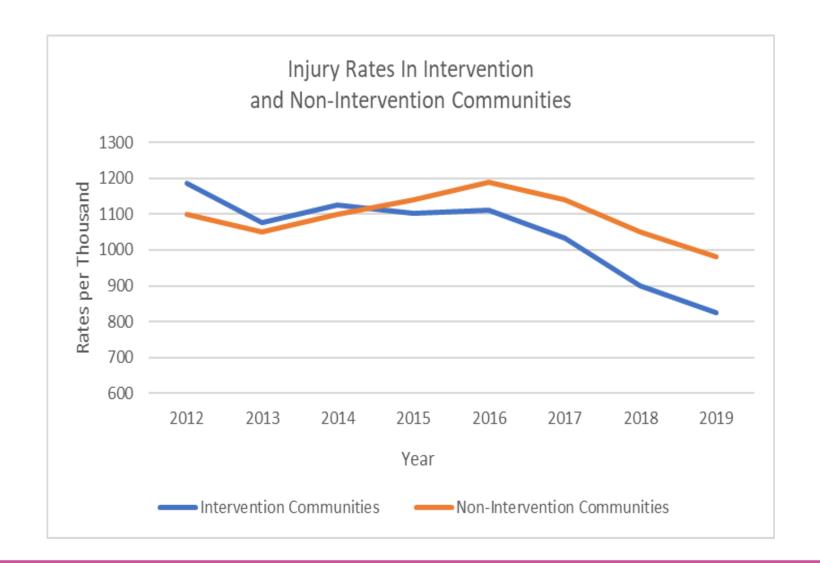

<u>Injury</u> = high cost to society:

Average Cost of One Home Safety Bundle	Vs.	Average Cost of One ED Visit				
\$97	\	\$721				

Shared Goal:

To keep kids and families safe—thereby making Norwood a healthier and happier city

Key Learnings

- Develop an "equitable framework" of outreach that supports opportunities to tier/tweak/share/spread/scale
- Time is needed to listen, engage & develop dialogue in each community to understand specific resources & needs
 - Set aside time to listen to community lived experiences & ask questions. The community will identify what is needed for their framework
 - Follow thru with community input (outreach should reflect the community voices)
 - Be honest about what community identified needs can not be supported & provide other resources, if possible. (i.e., Norwood asked for car seats as part of the safety bundle. CCHMC budget did not allow. Car seat education was included w/safety bundle & families were provided free car seat info from our State program.
- Community needs to engage community (recruit and compensate community champions)
- Need to share successes with community and potential outreach partners
- Need to connect leaders from different communities (word of mouth is powerful and community leaders can provide & influence support)
